

YASH JAIN

Snowflake Data Engineer

+91 8459851641 | yashjain698@gmail.com | [LinkedIn](#) | [Portfolio](#) | Pune, India

SUMMARY

Snowflake Data Engineer with 2.5+ years of experience architecting enterprise-scale cloud data platforms and production ELT/ETL pipelines on Medallion Architecture. Proven track record designing metadata-driven ingestion frameworks across 10+ source systems, cutting query execution time by 40% and compute costs by 30% through performance tuning and warehouse optimization. Deep expertise in Snowflake (Snowpipe, Streams, Dynamic Tables, RBAC, Data Masking), dbt, **PySpark**, **Apache Airflow**, SQL, Python, AWS (S3, Lambda, **Glue**, EventBridge), and dimensional modelling, with a strong focus on data quality, governance, and cost efficiency.

PROFESSIONAL EXPERIENCE

Snowflake Data Engineer

Mar 2024 – Present

NICE Software Solutions Pvt. Ltd. (Client Project: Zebra Technologies)

Pune / India

- **Medallion Architecture:** Architected a production-grade Snowflake Data Warehouse using Medallion Architecture (Bronze, Silver, Gold), supporting enterprise reporting and analytics for cross-functional Data Analytics and BI teams at Zebra Technologies.
- **Metadata-Driven Pipelines:** Built metadata-driven, reusable ELT/ETL pipelines using Snowflake, dbt, SQL, **PySpark**, Snowpark, and Python, orchestrating workflows with **Apache Airflow** and enabling configurable onboarding of 10+ source systems (cutting integration time by 35%).
- **Near Real-Time Ingestion & CDC:** Automated near real-time data ingestion and orchestration using **Apache Airflow**, Snowpipe, Streams, Dynamic Tables, Serverless Tasks, and CDC-based incremental loading, reducing data latency from batch (24-hour) refresh cycles to under 15 minutes.
- **Dimensional Modeling & SCD:** Designed dimensional data models (Star Schema, Fact & Dimension tables) and SCD Type-2 frameworks, delivering trusted, analytics-ready datasets that improved report accuracy and reduced manual reconciliation effort for downstream BI consumers.
- **Stored Procedures & UDFs:** Developed reusable Stored Procedures, UDFs, and framework utilities that standardized transformation logic across teams, shortening new-pipeline development time and improving code consistency across the engineering team.
- **Data Quality & Observability:** Implemented an enterprise data quality framework — automated validation, reconciliation, watermarking, audit logging, and exception handling — enabling end-to-end pipeline monitoring and faster root-cause identification for data incidents.
- **Security & Access Control:** Enforced Snowflake security architecture using RBAC, Secure Views, Dynamic Data Masking, Row Access Policies, and Resource Monitors, ensuring governed, least-privilege data access across multiple business units with zero audit findings.
- **Performance & Cost Optimization:** Improved query execution by 40% and reduced compute costs by 30% through Query Profile analysis, micro-partition pruning, clustering keys, caching strategies, and warehouse right-sizing.
- **Process Automation:** Automated a legacy manual reconciliation process that had run for 6+ years, eliminating several hours of recurring manual effort per week and removing a longstanding source of reporting errors.
- **Production Availability & Recognition:** Resolved a critical P1 production incident during off-hours to restore pipeline availability and ensure business continuity; partnered with the Director and Senior Manager of Data Analytics at Zebra Technologies to deliver certified semantic datasets for BI reporting.

SKILLS

Data Engineering	ELT, ETL, CDC, Medallion Architecture, Star Schema, Snowflake Schema, SCD Type 1/2, Data Warehousing, Data Modelling, Data Quality, Metadata-Driven Frameworks, PySpark , Apache Airflow , Databricks Basics
Snowflake Platform	Performance Tuning, Query Optimization, Virtual Warehouses, Streams, Tasks, Serverless Tasks, Dynamic Tables, Snowpipe, COPY INTO, External Tables, Time Travel, Fail-safe, Zero-Copy Cloning, Secure Views, Materialized Views, Clustering Keys, Query Profile, Resource Monitors, RBAC
Programming & Tools	SQL, Python (PySpark, Snowpark, pandas), dbt (including CI/CD via Git-based deployment), Git, GitHub, Jira
Cloud (AWS) & BI	S3, IAM, Lambda, AWS Glue , Athena , SNS, SQS, Event Bridge BI Tools: MicroStrategy, Power BI

AWARDS & RECOGNITIONS

- **Go-Getter (Sep 2025):** Awarded for outstanding feedback from the Director and Senior Manager of Data Analytics at Zebra Technologies.
- **Team Player (May 2025):** Recognized for going beyond working hours to resolve a critical P1 production incident over a weekend, ensuring business continuity.
- **Key Contributor (Jan 2025):** Honoured for exemplary diligence, commitment, and automating a legacy manual process running for 6+ years.
- **Bright Beginner (Dec 2024):** Recognised for exceptional delivery of complex tasks at the outset of career and fast ramp-up.

EDUCATION & CERTIFICATIONS

B.Tech, Electronics & Telecommunication Engineering

2023

SVP CET, Nagpur — CGPA: 8.90

Certifications: SnowPro Platform Associate — Snowflake | MicroStrategy Certified Professional
