YASH JAIN

Snowflake Data Engineer

+91 8459851641 | yashjain698@gmail.com | LinkedIn | Portfolio | Pune, India

PROFESSIONAL SUMMARY

Snowflake Data Engineer with 3 years of experience architecting and operating enterprise-grade ELT pipelines and cloud data warehousing solutions using Snowflake, Advanced SQL, Python (Snowpark), and dbt. Specialized in implementing Medallion Architecture (Bronze/Silver/Gold), automated near real-time ingestion via Snowpipe, Streams, and Serverless Tasks, and orchestrating workflow dependencies with Apache Airflow. Demonstrated expertise in dimensional data modeling (Star Schema, SCD Type 1 & Type 2), query performance tuning via Query Profile analysis and clustering keys, and cloud cost management (FinOps). Certified SnowPro Platform Associate with proven proficiency enforcing enterprise governance (RBAC, Dynamic Data Masking) and delivering high-fidelity analytical datasets.

WORK EXPERIENCE

Snowflake Data Engineer **Mar 2024 – Present**

NICE Software Solutions Pvt. Ltd. *Pune, India*

- Architected and deployed end-to-end ELT pipelines in Snowflake utilizing Medallion Architecture (Bronze, Silver, Gold), ingesting structured and semi-structured (JSON, Parquet, CSV) data from AWS S3 external stages via Snowpipe and COPY INTO commands.
- Engineered event-driven Change Data Capture (CDC) workflows using Snowflake Streams (standard & append-only) and Serverless Tasks, transitioning legacy 24-hour batch cycles to automated near real-time ingestion that slashed end-to-end pipeline latency to under 15 minutes.
- Developed modular, testable data transformation pipelines using dbt-snowflake and Advanced SQL, implementing incremental materializations, surrogate key generation, and automated singular/generic tests integrated with Git CI/CD.
- Designed robust dimensional data models (Star Schema with normalized Facts and Dimensions) implementing Slowly Changing Dimensions (SCD Type 1 and Type 2) with hash-diff change detection to maintain complete audit history across enterprise operational sources.
- Processed high-volume semi-structured payloads leveraging Snowflake VARIANT columns, OBJECT constructs, PARSE_JSON, and FLATTEN functions to extract and normalize nested attributes into curated analytical tables.
- Optimized Snowflake query execution and virtual warehouse utilization, driving a 40% reduction in query runtimes and 30% savings in credit consumption via Query Profile analysis, micro-partition pruning, clustering keys, and warehouse auto-suspend right-sizing.
- Implemented enterprise data governance frameworks including custom Role-Based Access Control (RBAC) role hierarchies, Dynamic Data Masking, Row Access Policies (RAP), and Resource Monitors to enforce least-privilege security and strict credit limits.
- Authored reusable SQL and Snowpark Python Stored Procedures and User-Defined Functions (UDFs) to automate database maintenance, schema evolution validation, and data deduplication routines.
- Orchestrated multi-step ELT DAGs in Apache Airflow with automated retry mechanisms, error alerting, and pre/post-load reconciliation checks that eliminated schema drift and undetected load failures.
- Automated a legacy manual data reconciliation workflow that had run manually for 6+ years, eliminating 8–10 hours of weekly manual effort; partnered with enterprise Data Analytics leadership to resolve off-hours P1 production incidents.

TECHNICAL SKILLS

Snowflake Platform	Snowpipe, Streams, Tasks (Serverless & Scheduled), Dynamic Tables, External Stages, Storage Integrations, COPY INTO, Zero-Copy Cloning, Time Travel, Micro-partition Pruning, Clustering Keys, Virtual Warehouses, Resource Monitors, RBAC, Dynamic Data Masking, Row Access Policies, Secure Views
Data Engineering & Modeling	Medallion Architecture (Bronze, Silver, Gold), ELT/ETL Pipelines, Change Data Capture (CDC), Dimensional Modeling, Star Schema, Snowflake Schema, SCD Type 1, SCD Type 2, Fact & Dimension Modeling, Data Quality & Reconciliation, Data Profiling
Languages & Frameworks	SQL (Advanced ANSI SQL, Window Functions, CTEs, Analytical Queries), Python (Snowpark Python, snowflake-connector-python, PySpark, pandas), dbt (dbt-snowflake, modular models, incremental materializations, tests), Stored Procedures, UDFs
Cloud & Orchestration	AWS (S3, IAM, Lambda, EventBridge, CloudWatch), Apache Airflow (DAGs, TaskFlow API, SnowflakeOperator), Git, GitHub Actions (CI/CD Pipelines), Jira

AWARDS & RECOGNITIONS

- **Go-Getter (Sep 2025):** Awarded for outstanding feedback from enterprise Data Analytics leadership and delivering high-impact Snowflake data assets.
- **Team Player (May 2025):** Recognized for resolving a critical P1 production pipeline incident over a weekend, preventing executive reporting downtime.
- **Key Contributor (Jan 2025):** Honoured for automating a legacy manual data reconciliation workflow running for 6+ years, saving 8–10 hours weekly.
- **Bright Beginner (Dec 2024):** Recognized for rapid technical ramp-up and exceptional delivery of complex cloud data engineering tasks at career outset.

EDUCATION & CERTIFICATIONS

B.Tech, Electronics & Telecommunication Engineering **2023**

SVPCET, Nagpur — CGPA: 8.90

Certifications: SnowPro Platform Associate — Snowflake
